Paul Robbiano - Engineer

APR 3-4613

In 1943, Mr. Robbiano received the degree of A.B. in Communications, at Stanford University.

From June 1943 to December 1945, he was employed at the Radio Research Laboratory, Harvard University, in the design, construction and testing of radar jamming transmitters. Mr. Robbiano was sent to Great Britain as a technical consultant on RCM equipment in connection with the British Navy's D-Day preparations, and remained with the 8th Air Force, as a technical consultant, until V-E Day.

In December, 1945, Mr. Robbiano was employed by Electronics Research, Inc. and has been engaged in antenna flight testing, and the design of r-f antenna coupling transformers, electronic noise generating equipments, wide-band i-f amplifiers and high power oscillators in the UHF range.
